Jl. Kumala No. 40 Makassar, South Sulawesi

Fullstack Developer and Informatics Engineering graduate from Hasanuddin University and Bangkit Academy 2024 (Cloud Computing) alumna. I have hands-on experience in GCP, JavaScript, Python, React, and Next.js. Passionate about building scalable digital solutions, integrating robust backend infrastructures with responsive frontend interfaces.

Education

Universitas Hasanuddin - Gowa, Indonesia

Aug 2021 - Feb 2026 (Expected)

Bachelor of Informatics, 3.80/4.00

- Web Development & UI/UX: Designed Figma interfaces and implemented full-stack features using React to produce responsive and user-centric web applications.
- Bangkit Academy 2024 (Cloud Computing): Managed Google Cloud Platform (GCP) infrastructure intensively to build efficient, scalable, and robust foundations for large-scale applications.
- Undergraduate Thesis (NMT Ornithology): Developed an NMT system for the ornithology domain using OPUS-MT and FLAN-T5 models with freeze-layer optimization for efficiency.

SMA Negeri 2 Makassar - Makassar, Indonesia

Aug 2018 - May 2021

Senior High School

Work Experiences

Center of Technology (CoT) Fakultas Teknik UNHAS - Gowa, Indonesia

Mar 2024 - Nov 2024

Frontend Developer - Internship

- Built internal management application interfaces using React and Ionic to effectively digitalize internal administrative processes.
- Implemented responsive designs using HTML, CSS, and JavaScript to optimize application accessibility across mobile and web platforms.
- Integrated frontend components with REST APIs through team collaboration to ensure seamless and accurate user data synchronization.
- Performed routine interface testing and debugging to improve the User Experience (UX) quality of the developing systems.
- Managed code version control using Git/GitHub to facilitate organized technical collaboration within the development team environment.

Organizational Experience

Coder Institute at Unhas - Gowa, Indonesia

Feb 2022 - Feb 2023

Member

- Actively engaged in study group sessions focusing on transforming UI/UX design concepts into functional frontend implementations.
- Translated design references and wireframes into responsive, well-structured static pages and landing pages.
- Developed user interface components using HTML, CSS, and JavaScript with a focus on visual consistency and usability.

Google Developer Student Club (GDSC) at Unhas - Gowa, Indonesia

Aug 2022 - Present

Member

- Actively involved in GDSC through various technical workshops, networking events, and collaborative projects to strengthen software development skills.

Skills & Projects

- Fullstack & Cloud Skills:** Proficient in JavaScript (ES6+), Python, SQL, React, Next.js, and Node.js. Experienced with Google Cloud Platform (GCP), RESTful APIs, Git/GitHub, Figma, and Vercel deployment.
- Neural Machine Translation for Ornithology (Undergraduate Thesis) (2026):** Built an automated translation system for the ornithology domain based on Attention architecture through fine-tuning OPUS-MT and FLAN-T5 models. Managed the CUB-200-2011 dataset, optimized training with freeze-layer and grid search techniques, and evaluated model accuracy using BLEU and METEOR metrics.
- Bangkit Capstone (2024):** Managed backend and cloud development for a mobile travel itinerary application through the implementation and integration of RESTful APIs. Responsible for deploying services on Google Cloud Platform (App Engine) and configuring cloud infrastructure, including logging and monitoring for system stability.
